379 Bethesda Rd Asestos Asessment.pdf;

Good morning,

Spartanburg County Environment Enforcement is seeking quotes to demolish one single family structure. The asbestos testing has been completed and no asbestos was located on any of these structures.

379 Bethesda Road Spartanburg SC 29307 parcel tax id 3-23-00-068.00 is a single family 1 half story residence, wood exterior with a block foundation. The asbestos assessment is attached. This structure will require project design and air monitoring.

SCOPE OF SERVICES

The vendor shall perform all work necessary as specified in the quote and provide all labor, insurance, supervision, and any other incidental items necessary. The work will be performed on residential structures that have been condemned and ordered to be torn down by Spartanburg County. Therefore, Spartanburg County must have the unsafe, dilapidated and deteriorating residential structures removed to ground level or basement level providing the structure contains a basement. Spartanburg County will mandate the vendor will remove all concrete slabs, floors, basement walls, foundations, footings, sidewalks, steps, patios, and driveways, etc. to leave only ground and soil on the site.

The vendor will secure any required permits from Spartanburg County Building Codes Department. The vendor will ensure all requirements of permits are followed and completed as required by the standards of Spartanburg County Building Codes Department. After the demolition is complete, the vendor will request a final inspection of the property by the Spartanburg County Building Codes Department and will complete all steps necessary to close out the demolition permit.

Fill all crawl spaces or basements or septic tanks holes with compactable red clay. Existing dirt on a lot may be used to level the lot if it does not cause erosion, depressions, or other drainage problems. Harley rake must be used to remove all the small debris before planting grass and applying straw.

The vendor will sever and seal electrical, gas, water, sewer and telephone utility mains per the Utility Companies directives. Sewer services shall be disconnected as close as possible to the road right-of-way or property line. Spartanburg County will assist to have the appropriate electric utility remove the primary electric service to the structures prior to demolition. Any expense or damage to utilities shall be the responsibility of the vendor. Note that the vendor shall schedule an inspection with the appropriate utility provider and obtain a release in writing that the termination of utilities is acceptable to the utility provider.

As required the Vendor will include cost of environmental testing of lead-based paint and asbestos as well as the cost of capping the sewer on public utilities as required by the appropriate utilities. The vendor shall also acquire and pay any required application fee.

As required, the Vendor must follow the current sanitary sewer district policies, if applicable as it relates to the structure and capping sewer lines.

The vendor will demolish (raze/tear down) each structure, to include the removal of the structure, removal of all debris to include any foliage or vegetation hindering the vendors capability to work. The structures will be taken down to grade.

No underground storage tanks are anticipated, but if discovered, vendor will notify County immediately and remove tanks and contents in accordance with SCDHEC standards and obtain any applicable permits. This would be treated as an additional scope to the proposal.

If required, air monitoring and site design will be performed by a vendor hired by the County. If such services are required at a location. The demolition vendor must contact the asbestos vendor prior to beginning work.

The vendor will ensure all hauled load tickets are labeled with location the load is being hauled from.

Scope of work demolition of the structure shall be in accordance with all applicable regulations for the following property (a site map with designations follows):

Scope of work:

- Demolish and remove residential structures as required by Spartanburg County.

  - Remove any foliage and/or vegetation hindering the work area.
  - Remove all rubbish and debris scattered about each property.
  - Remove any secondary structures onsite.

Vendor may use any standard method of demolition allowed by law for onsite demolition except burning or blasting.

Vendor must protect adjacent residential structures, buildings, and existing structures from any damage.

Vendor will make every effort to contain the byproduct of demolition to said property.

Vendor must transport all material to an approved landfill. The Vendor may transport any recyclable brick and allowable concrete any approved recycling location either within or out of Spartanburg County. The Vendor must provide Spartanburg County with either the original or copy of the waste manifest receipts all transported material. These items must be provided to Spartanburg County with the final invoice for all asbestos and demolition materials disposed. Spartanburg County will delay payment of invoices if said receipts are not submitted. Vendor must transport material to an approved landfill. Vendor may transport any recyclable brick and allowable concrete to an approved location either in or out of Spartanburg County. The Vendor provide the original/copy waste manifest receipts must be presented with the final Invoice for all asbestos and demolition materials disposed. Payment of Invoices will be delayed if waste manifest receipts are submitted for the asbestos and demolition of the site.

Vendor will grade and smooth any exposed uncovered earth to prevent standing water. Backfill shall be excavated material and be placed in 8" lifts and compacted by mechanical tamping. Any excavated basement, footing or low areas will be filled to adjacent grade with suitable fill material and compacted to 95%.

Vendor will remove all trash and debris from site and rake clean all excavated areas. Vendor to stabilize graded soil - rye or fescue covered field rates = 7 lbs per 1,000SF plus clean straw cover. Vendor will provide erosion control measures as required. Vendor will be responsible for keeping adjacent streets and storm drains clean.

Vendor will secure and pay for all required permits/licenses for the completion/execution of the work. This will include building demolition permits.

All work will be performed in accordance with applicable local codes, OSHA requirements and DHEC requirements whether or not covered herein.

Spartanburg County reserves the right to remove any structure from the contract either before or after execution as it deems necessary.

Please submit your quote to me either in person or email by Friday, 8/19/2024.
